AUGUST 2009 / £4.75

*No one in their right mind would buy a high-end kitchen without seeing it in a showroom, or indeed a luxury motor car without taking it for a test drive. So why would anyone purchase state of the art home technology without experiencing it first?*

## Enter Finite Solutions new Home Technology Showhouse.....

The multi award winning Finite Solutions has recently unveiled the largest home technology showroom in the UK, set in a beautiful Victorian property in Leeds. The 4000+ square foot showroom (or showhouse as Finite Solutions refers to it) features the very latest cutting edge technology, integrated seamlessly into a decadent period property. It allows specifiers and clients the like to really get to grips with the technology and see what options are available to not only hide technology, but also to make it really create a wow factor within the home.

The showhouse features all the latest James Bond style concealment technologies such as projectors dropping down from ceilings, screens appearing out of walls, masterpieces of artwork rising up to reveal TVs and projector screens popping up from within pieces of furniture. All the technology has been chosen to merge effortlessly with the design of the property using such products as custom designed cabinetry and speakers disguised as artwork to create the ultimate 21st Century house, within a stunning 19th Century interior.

The technology on show features everything from cinemas, to security systems, lighting control and mood lighting, a Crestron home automation system gate entry and even a dedicated hi-fi music room. The 6 seater dedicated cinema room in the basement with an 8 foot projection screen blows you away with the audio and visual impact, whereas the more subtle hidden cinema room hides 2 different cinemas completely out of sight in a single room. There is also a fully functioning board

room/dining room, lounge room, kitchen and bathrooms with varying degrees of technology.

The Finite Solutions showhouse is an appointment only facility in which clients and specifiers can have a personal tour of all the technology on offer and learn more about how it can benefit them. Finite Solutions also uses the Showhouse to host a variety of RIBA accredited CPD events. If you would like to arrange a CPD at and also have the opportunity to play with the technology first hand then please contact the Leeds office. Or alternatively if you are based in London we can come to your offices and deliver a home technology seminar tailored to your needs.

Finite Solutions recently won Best Home Cinema Installer 2009 in the Home Cinema Choice awards, as well as numerous awards in the 2009 CEDIA awards. They are fully accredited by CEDIA (Custom Electronic Design and Installation Association) as well as founding members of PAC (Passionate about Cinema). With offices in Leeds and London they cater for most areas of the country working with budgets from £10,000 upwards in their Leeds office and £30,000+ in their London office. They provide a full design, installation and project management service ensuring a complete "turn-key" solution.
